Office Action Summary

DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on 6-11-01 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 5,830,068, 6,004,211 and 6,089,981 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 through 105 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 through 115 of copending Application No. 09/373,120. Although the conflicting claims are not identical, they are not patentably distinct from each other.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 through 4, 10 through 14, 22 through 36, 65 through 82, and 94 through 100 are rejected under 35 U.S.C. 103(a) as being unpatentable over Algie, U.S. Patent No. 5,564,977 in view of Ueno, U.S. Patent No. 5,746,657.

Algie discloses the broadly claimed invention except the reference lacks clearly disclosing a place to make wagers; although the reference discloses a keyboard connected to the system. In analogous device, Ueno discloses a place to make wagers. It would have been obvious to apply the teachings of Ueno to the disclosed system of Algie in order to permit bettors to make wagers on the information supplied by Algie's system.

Claims 5 through 9, 15 through 21, 37 through 64, 83 through 93 and 101 through 105 are rejected under 35 U.S.C. 103(a) as being unpatentable over Algie and Ueno as applied to claims above, and further in view of Handelsman, U.S. Patent No. 5,539,450.

Although Algie and Ueno disclose advertising, they lack clearly disclosing the ability to permit players to purchase merchandise and to have accounts for betting and shopping. In an analogous device, Handelsman teachings such features in a system that permits gaming and shopping among other things. Therefore, it would have been obvious to one of ordinary skill in the art to apply the teachings found in Handelsman to the system of Algie and Ueno, in order to capitalize on the "spur of the moment" want of players seeing the products for sale.

Response to Arguments

Applicant's arguments filed 6-11-01 have been fully considered but they are not persuasive.

In response to the Applicants remarks with respect to the provisional double patenting rejection. This rejection is not the only rejection to the instant claims. Therefore, this rejection is maintained.

In response to the Applicants remarks with respect to the disqualification of Ueno as prior art has been considered, but is unpersuasive to remove the reference because Ueno is being used to show universal fact: a place to make wagers. There are many wagering places and Ueno is being utilized to demonstrate that universal fact. As a result, this is an exception to the rule that the critical reference date must precede the filing date, see MPEP 2124. Therefore, the rejection of the instant claims is being maintained.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action

Art Unit: 3713

is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a).

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.
